

# Join our team

**Are you passionate about ensuring products meet quality specifications? Do you have a scientific background with experience of product testing in FMCG industry? Are you ready to lead a team responsible for testing from raw materials to bulk to finished goods?**

**If the answer is yes - then look no further. Church & Dwight UK Ltd have an exciting opportunity for an Analytical Shift Lead to join our Quality Control (QC) Department based at our factory site in Folkestone, Kent.**

As the Analytical Shift Lead you will direct the QC shift team in the analytical support of Church & Dwight in-house production operations inclusive of fast moving cosmetics and medical device products.

The Analytical Shift Lead plays a pivotal role in the accurate and efficient analysis of raw materials, bulk product and finished goods against approved specification. Additional responsibilities include focusing on product specifications, escalating quality issues and process validation. This role works closely alongside our Production, Research & Development, Regulatory teams amongst other departments.

This role involves shift work of 12-hour shifts: 6am – 6pm, 4 days on, 4 days off rotation.

In return, we offer a competitive salary with 23 shifts annual leave, an annual company performance related bonus, health cash plan and highly competitive pension scheme.

**This is a great opportunity to work with recognisable global brands and shape their future. Sounds interesting? Send us your CV, confirming your salary expectations, and let's talk!**
