

Join our team

Do you want to be responsible for the packaging of recognisable household brands? Do you have a deep understanding of Packaging Development?

If the answer is yes - then look no further. Church & Dwight UK Ltd have an exciting opportunity for a Packaging Technologist to join our Research and Development (R&D) team based at our brand new R&D facility in Folkestone, Kent.

Our Packaging Technologists are responsible for product development, regulatory and legislative practices and quality improvement.

Packaging technologists must be able to demonstrate key business acumen by managing project documentation, implementing testing means and providing support cross-functionally on both a departmental basis through to full scale manufacturing production.

This role requires a driven individual who is knowledgeable on the development of packaging and testing variations as well as maintaining current manufacturing techniques for packing consumer projects. The role involves significant project work, so the ideal candidate will have excellent project management skills and flexibility. They will be result driven, with strong communication skills and ability to deliver organisational business goals and objectives.

Our R&D team work closely with both internal, external partners to bring tomorrow's winning products to market.

In return, we offer a competitive salary with 24 days annual leave, an annual company performance related bonus, health cash plan and highly competitive pension scheme.

This is a great opportunity to work with recognisable global brands and shape their future. Sounds interesting? Send us your CV, confirming your salary expectations, and let's talk!
